

CO2 emissions in time and in the world

On this poster we can see a graph which the CO2 emission from 1960 until 2020, we can also see the reduction target that should be reached in 2030 and 2050. This poster allows people to call out on our CO2 emission which is only growing

On this poster we also see another graph which represents the emission of CO2 in different countries. We can say that China and the United States are the countries which emit the most CO2
